DETAILED ACTION

1. The request filed on January 2, 2002 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/505,915 is acceptable and a CPA has been established. An action on the CPA follows.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 17-40, 42-205 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shavit et al. (USPN 4,799,156, hereinafter "Shavit") in view of Smith (USPN 5,450,123), and further in view of Filepp et al. (USPN 5,347,632, hereinafter "Filepp").

Shavit discloses an electronic commercial transaction system (interactive market management system) for selectively enabling communication between members of plural groups (buyers 82, suppliers 84, distributors 83, etc.), comprising:

- an interface (communication interface 79; col. 5, lines 43-47);
- an input system (personal computers 62, 64; col. 5, lines 20-24, 28-32);
- a memory (database stores subscriber data and request data which designates the area of commercial interest; col. 7, lines 23-46; col. 25, lines 28-50);
- a control system (system 50 notifies users via electronic mail of bids, promotions, etc.; col. 11, lines 47+; col. 17, line 52 - col. 18, line 51).

Art Unit: 2643

Shavit provides for audio indication (col. 7, lines 50-57) or facsimile notification (col. 14, lines 20-22), the placement of orders in response (col. 19, lines 19-34) and inventory access (col. 17, lines 56-61).

Shavit differs from the claims in that although it provides for allowing subscriber access to a variety of data base services (col. 5, lines 58-65; col. 7, lines 6-46), it does not specify communication video. However, Smith teaches the desirability of allowing buyer access to a vendor supplied video image stored in a video file server (video source and database 6) for enhancing sales communication with the use of video (col. 1, line 51 - col. 3, line 27) such that it would have been obvious to an artisan of ordinary skill to incorporate such use of video, as taught by Smith, within the method of Shavit in order to allow a buyer to view the desired goods or services. Smith provides for prompts to view an available video (col. 2, lines 53-56; col. 4, lines 45-50) and providing client specific video (col. 5, lines 48+).

The combination of Shavit and Smith further differs from the claims in that although Smith provides for supplying customized information (col. 5, lines 48+), it does not specify storing in memory identification data of an interested buyer in association with a designated area of commercial interest. However, Filepp teaches the desirability of storing user data in association with a designated area of commercial interest in order to provide targeted advertisements according to collected parameters (col. 9, lines 27-47) such that it would have been obvious to incorporate such customization of advertisements, as taught by Filepp, within the combination of

Shavit and Smith so that potential buyers receive targeted promotional e-mail messages regarding products that would more likely interest the particular buyer.
